

QUALITY POLICY

The purpose of the quality policy at AMETEK Denmark A/S is to secure the supply of products, services and repair of a constantly high quality and to ensure that we serve our customers satisfactorily and in a way that we always meet the requirements and expectations of our customers.

To support the quality policy, AMETEK Denmark A/S has established an electronically based quality management system, which is only available for the employees of the company. The quality management system includes all activities related to sales, development, production, service and supply of instruments for calibration as well as electrical temperature sensors manufactured at the address Gydevang 32-34, 3450 Allerød, Denmark.

Through established procedures, AMETEK Denmark A/S aims at addressing risks and opportunities to ensure that the quality management system leads to the intended results, facilitates the desired effects, prevents and minimizes the undesired effects and achieves improvement.

Consequently, the management at AMETEK Denmark A/S has committed itself to:

- Establish and maintain a general quality management system, which does not only meet the standards specified in ISO 9001:2015 but which also provides measurable values to the company as well as its stakeholders.
- Ensure that the company meets the existing legal and regulatory requirements
- Set relevant, realistic and measurable quality targets supporting the quality policy and the overall strategy of the company.
- Establish and maintain an accredited quality management system to the laboratory function that meets the standards cf. DS/EN ISO 17025, including technical instructions and notifications.
- Improve the attitude of employees and stakeholders leading to regular improved performances and enhanced customer focus.
- Make sure that sufficient resources are available to execute the quality policy.
- Equip the employees with the necessary competences to ensure that the quality is sustained.
- Interact closely with our stakeholders to ensure a high quality on products, services and repair
- Ensure that the quality policy is available to all employees and customers.

To support the above-mentioned commitments, the management will develop and provide documentation for actions and procedures ensuring:

- Development of products, services and repair matching customer expectations, needs and requirements.
- Measurement and surveillance of process performances, including customer satisfaction to ensure a regular improvement of quality management and procedures.
- Maintaining of unprejudiced and well-qualified employees to carry out activities as specified according to DS/EN ISO 17025 so that all accredited services are at any time carried out in compliance with current professional practice and according to established procedures and requirements.
