

FRODE PEDERSEN

Application

- For measurement and surveillance of temperature on f.inst plastic extruders, tools and machine constructions
- Can be used on surfaces up to 180°C.
- Fields of application
 - Plastic industry
 - Machinery- and tool industry

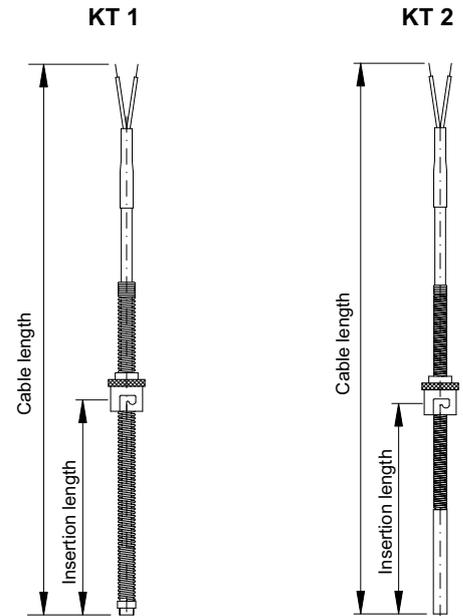

Technical features

- Thermocouple type J and K acc. to IEC 584-1
- Very fast response time. Achieved by grounded hot junction and spring loaded contact to the surface
- Solid construction with high resistance against vibration
- Quick mounting and adjustment of insertion length by means of a bayonet socket on a spring.

Ordering

Please select the requested sensor from the table below
The colour code means:

- Standard: Built of standard modules (short delivery time)
- Variant: Modified standard modules
- Special: Special versions and material. We are specialists in temperature measurement. Please contact us and we shall do our utmost to solve your specific measuring tasks

Ordering information

Specifications number	Sensor									
1701-										

Type

KT 1	Insertion length, adjustable 10-350mm	0	0	1	1 meter
KT 2	Insertion length, adjustable 50-350mm	1	x	x.x	Special (Min 0.1 meter)
Special:		s			

Cable type

0 XGLGLO 2x0.22mm ² . Fibreglass +steel braid, 200°C
s Special:

Process connection (see page 2)

Material: Nickel plated brass

None	0
1/4" BSP Bayonet nipple:	1
Special:	s

Tolerance acc to IEC 584-2

0 Class 2, for J, K and N, i.e. ±2.5°C or 0.0075 x t _{actual} (°C) ¹⁾
s Special:

Note 1: The highest value apply

Thermocouple and measuring range

Fe-CuNi	type J	Max. 400°C	0
NiCr-Ni	type K	Max. 400°C	1
Special:			s

Hot Junction

0 Grounded (thermocouple bonded to outer sheath)
1 Insulated from outer sheath

Number of thermocouples

1	0
Special:	s

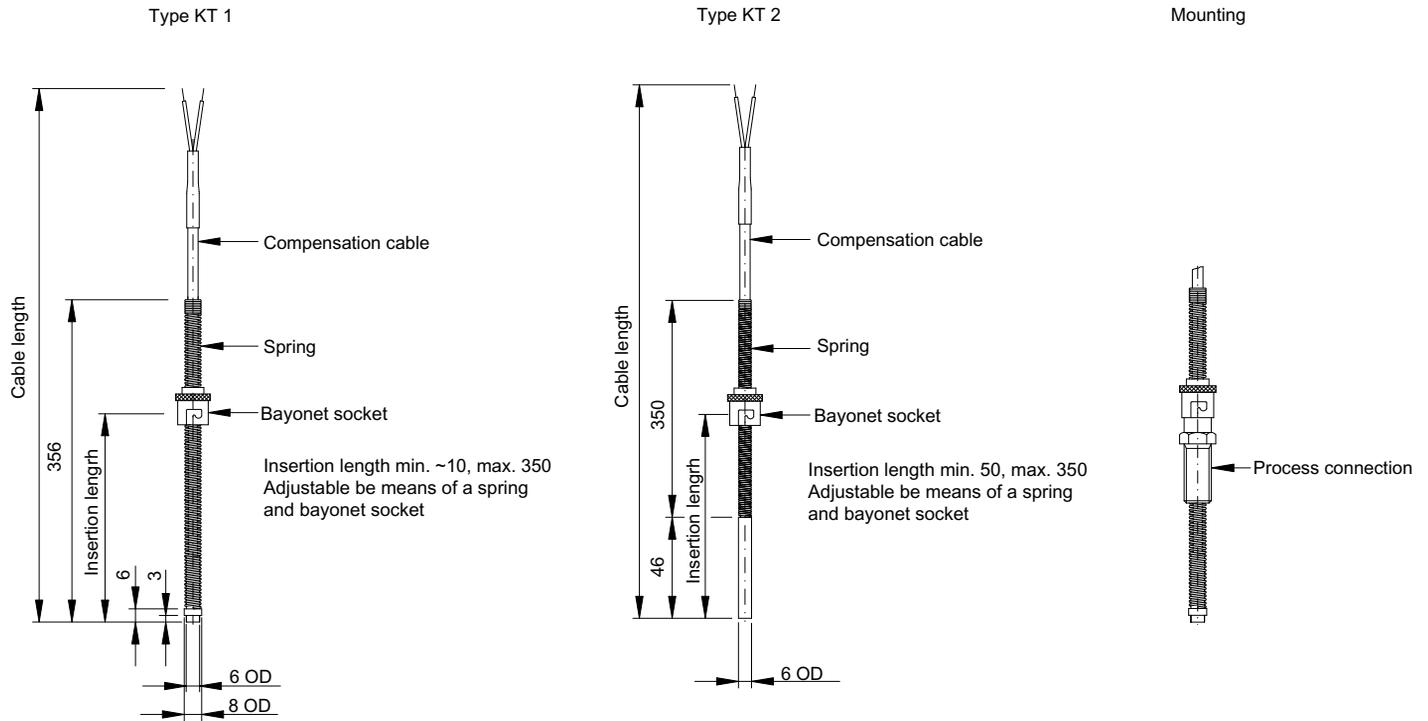

Accessories

Compensation cable: See data sheet 9150
